Professional Summary

Final-year B.Tech. Information Technology student with a strong foundation in software engineering and problem-solving. Experienced in developing full-stack applications, backend services, and AI-powered solutions using modern technologies. Hands-on experience with LLMs, RAG, and multi-agent systems through research and project work. Passionate about building reliable, scalable solutions to solve real-world problems.

Education

Guru Ghasidas Vishwavidyalaya 2023-2027

Bachelor of Technology in Information Technology (GPA: 8.75 / 10) *Bilaspur, Chhattisgarh*

- **Relevant Coursework:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Computer Networks (CN), Operating Systems (OS)

Experience

IIT (ISM) Dhanbad May 2026 – Jun 2026

Research Intern - SRIS 2026 *Dhanbad, Jharkhand*

- Developed a Multi-Agent Early Health Prediction System combining ML models, LSTM-based time-series analysis, and clinical rule-based agents for early patient deterioration prediction.
- Applied Explainable AI (XAI) techniques, including SHAP and counterfactual analysis, to interpret model predictions and identify key clinical features.

Labmentix Private Limited Jun 2025 – Jul 2025

Web Development Intern *Remote*

- Developed interactive UI components using React.js and contributed to web application development.
- Worked with Node.js, Express.js, and REST APIs across the development workflow.

Projects

PaprAI – RAG-powered Research Assistant | *React, FastAPI, PostgreSQL, pgvector, Gemini* GitHub

- Built a full-stack AI research assistant supporting semantic search, paper discovery, summarization, and RAG-based Q&A across 12,000+ research papers.
- Engineered a PDF ingestion and retrieval pipeline using SentenceTransformer embeddings and pgvector, with optimized vector search and database queries to speed up context retrieval.
- Integrated Gemini for paper summarization, research-gap identification, and contextual Q&A, adding source citations and streaming responses to improve answer transparency and reduce perceived latency.

Freelancer Marketplace | *Next.js, Node.js, Express.js, MongoDB, Socket.io, Stripe* GitHub

- Built a full-stack gig marketplace with JWT-based role-based access control and real-time buyer-seller communication using Socket.io.
- Integrated Stripe for secure payment processing and built seller dashboards to streamline gig management.
- Added a review-rating system to build user trust.

Document Signature Application | *React, Node.js, Express.js, MongoDB, Cloudinary, Multer* GitHub

- Built a platform to upload, view, and digitally sign PDFs online with secure file handling via Multer.
- Used iframe-based PDF rendering and Cloudinary storage for fast, reliable document loading.

Technical Skills

Languages: C++, Python, C, JavaScript, SQL
Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: PostgreSQL, MySQL, MongoDB
AI/ML: Machine Learning, Deep Learning, NLP, LLMs, RAG
Libraries & Tools: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, Streamlit, Git, GitHub, Postman
